

ECON-AI

● Econ-AI

AI-Powered Macroeconomic Intelligence

Transforming massive economic datasets into strategic, executive-ready decisions for Saudi Arabia's financial sector.

Executive Summary

Strategic Overview

AI-DRIVEN

KSA FOCUSED

The Challenge

Current State

Traditional economic analysis is too slow for modern markets, taking per report cycle.

4-6 weeks

Misses ~70% of cross-sector interactions

Our Solution

The Innovation

An AI-powered macroeconomic intelligence platform that delivers comprehensive insights in .

<30 minutes

Automated end-to-end analytical pipeline

Key Value

Core Benefits

Real-time Insights

Causality Detection

Auto-Forecasting

Executive Narratives

Target Impact

Strategic Application

Elevates decision-making across Saudi banks' critical functions through proprietary intelligence.

Strategy

Risk Management

Client Advisory

The Business Problem

Traditional Approach

Status Quo Inefficiencies

Slow Reporting Cycle

Takes 4-6 weeks to produce reports

Siloed Analysis

Departments analyze data in isolation

70% Gaps

Manual Data Gathering

Analyst time spent on collection vs analysis

85% Time

Narrative Gap

Manual translation of stats to strategy

The Cost

Business Impact & Risk

Missed Opportunities

Inability to capitalize on rapid shifts

Reactive Risk Mgmt

Responding after conditions degrade

Slow Decision Making

Strategic lag vs market reality

Competitive Disadvantage

Falling behind data-driven peers

Our Solution Overview

Forward-Looking Market Intelligence

Core Economic Data

GDP & Production

- Oil/Non-Oil Growth
- Industrial Output

Fiscal Policy

- Revenue Streams
- Public Debt

Trade

- Export/Import
- Trade Balance

Investment

- FDI Inflows
- Capital Formation

Monetary

- M0-M3 Supply
- Bank Liquidity

Inflation

- CPI Trends
- Housing Costs

Real-Time Intelligence Engine

Live Feed

Financial Markets

Real-time integration of stock tickers, bond yields, and commodity prices.

Global Context

Global Economic News

Fed decisions, geopolitical shifts, and trade policy impacts analyzed instantly.

FOMC OPEC+ G20

AI Powered

Tailored Predictions

AI generates bespoke forecasts tailored to your specific portfolio and risk profile.

Built for Saudi Arabia

🇸🇦 Vision 2030 Aligned

01

Oil-Economy Dynamics

Hydrocarbon dependency analysis

- Fiscal breakeven oil price modeling
- Oil vs. Non-Oil GDP decomposition
- Brent crude correlation mapping

02

Vision 2030 Tracking

Transformation progress metrics

- Non-oil private sector growth
- FDI inflows & diversification
- Sectoral employment (Saudization)

03

Fiscal Sustainability

Sovereign balance sheet health

- Revenue composition analysis
- Giga-project spending multiplier
- Sovereign debt trajectory

04

GCC Integration

Regional economic linkages

- Regional trade flow mapping
- Cross-border capital movements
- Trading partner concentration

Strategic Use Cases

01

CEO / Board

Strategic Leadership

- Data-driven strategic planning & resource direction
- Sector-level investment allocation optimization
- Vision 2030 opportunity mapping & timing

02

CFO

Financial Stewardship

- Fiscal sustainability & breakeven assessment
- Optimized treasury positioning & liquidity mgmt
- Sovereign exposure & balance sheet management

03

Chief Risk Officer

Risk Governance

- Systemic risk monitoring & contagion alerts
- Automated scenario stress testing (Oil/Trade)
- Early warning signals from causal networks

04

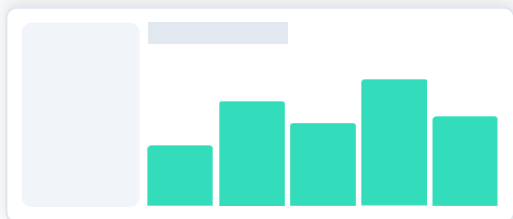

Strategy Office

Growth & Expansion

- Predictive market entry timing & signals
- Sector allocation aligned with non-oil GDP
- Competitive positioning vs regional peers

Intelligence Outputs

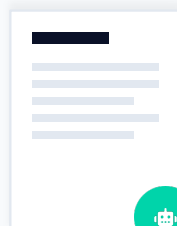

Multi-Channel Delivery

Interactive Dashboard

Real-time exploration of economic indicators.

- ✓ Real-time sector tabs & filtering
- ✓ 11 interactive chart types
- ✓ Deep drill-down capability

AI-Generated Reports

Executive narratives derived from data.

- ✓ Automated executive summaries
- ✓ Tiered policy recommendations
- ✓ 12-month sector outlooks

```
GET /api/v1/forecasts
{
  "sector": "robotics"
  "growth": 442
  "conf": 0.95
}
```

Structured Data Feeds

Direct integration for internal systems.

- ✓ JSON/API real-time integration
- ✓ Structured datasets (Clean Data)
- ✓ Internal model pipeline ready

Why It Matters

Insights

Causality Detection

Sample Strategic Insights

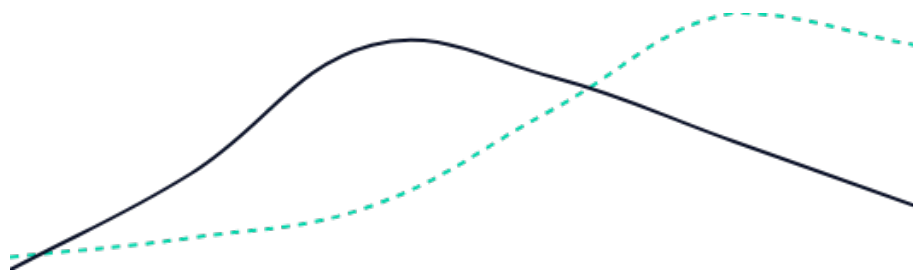

01

Causality Discovery

LEAD INDICATOR

"Non-oil Investment growth Granger-causes Industrial Import growth with a **2-month lead**."

STRATEGIC IMPLICATION

Early warning signal for trade finance demand and FX positioning strategy.

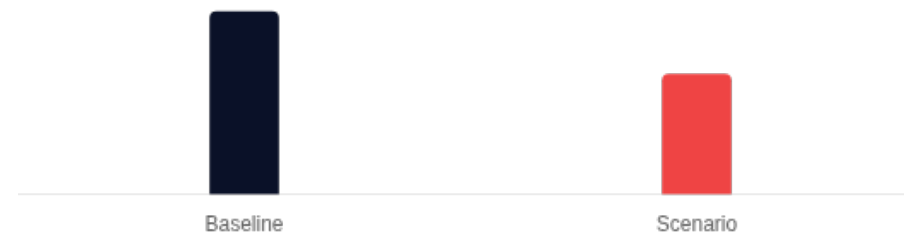

02

Scenario Simulation

IMPACT ANALYSIS

"A 15% decline in global trade volumes results in approximately **1.2% GDP contraction**."

STRATEGIC IMPLICATION

Critical parameter for portfolio stress testing and sovereign credit assessment.

Security & Compliance

SAMA Compliant

On-Premise Deployment

Zero cloud dependency. Full air-gap capability for maximum isolation.

Data Sovereignty

Fully compliant with SAMA regulations & Saudi PDPL requirements.

Audit Trail

Reproducible pipelines with timestamped analysis logs for governance.

No Vendor Lock-In

Built on open-source foundations using standard data formats.

Bank Control

Full ownership of model weights, code, and data artifacts.

Implementation Roadmap

16-Week Rapid Value

Weeks 1-4

01

Pilot Program

Foundation

- ✓ Deploy secure on-premise instance
- ✓ Configure 38+ KSA-specific indicators
- ✓ Validate econometric forecast accuracy

Weeks 5-10

02

Customization

Integration

- ✓ Integrate internal bank data feeds
- ✓ Train research & risk teams on platform
- ✓ Tailor department-specific dashboards

Weeks 11-16

03

Scale & Expand

Production

- ✓ Establish automated production cycle
- ✓ Generate client-facing advisory reports
- ✓ Expand coverage to GCC region

Next Steps

Action Plan

1

WEEK 1

Pilot Agreement

Define project scope, select priority sectors, and establish success metrics for the pilot.

2

WEEKS 2-3

Data Onboarding

Connect SAMA & GASTAT feeds. Integrate bank internal data sources securely.

3

WEEK 4

Live Demonstration

Run first analytical cycle. Present dashboard and AI insights to key stakeholders.

4

WEEK 5+

Production

Full on-premise deployment, team training, and automated monthly reporting.

Ready to transform your economic intelligence?

Move from reactive data gathering to proactive, AI-driven strategic foresight.
